PERSONAL PROJECTS

WEBSITE SCRAPING DISCORD BOT
May 2024 – August 2024
- Designed and developed a **Python** based Discord bot used for scraping specific video game character "build" information requested by a Discord user
- Reads specific commands from any Discord server it is present in
- Utilizes data scraping methods to navigate through **HTML** to collect images and text from the video games wiki website
- Information retrieved gets saved onto the computer and sent into an image building process that formats based on the requested character
- Completed image with all relevant information gets published where the user requested the Discord bot
